

## Case 3120

**ISCHNURAINAE Fraser, 1957 (Insecta, Odonata): proposed conservation as the correct spelling of ISCHNURINAE to remove homonymy with ISCHNURIDAE Simon, 1879 (Arachnida, Scorpiones)**

Victor Fet

*Department of Biological Sciences, Marshall University, West Virginia 25755, U.S.A.* (e-mail: fet@marshall.edu)

Günter Bechly

*Staatliches Museum für Naturkunde, Abt. Paläontologie, Rosenstein 1, D-70191 Stuttgart, Germany* (e-mail: bechly@gmx.de)

**Abstract.** The purpose of this application is to remove the homonymy between the damselfly subfamily name ISCHNURINAE Fraser, 1957 (type genus *Ischnura* Charpentier, 1840; family COENAGRIONIDAE) and the scorpion family name ISCHNURIDAE Simon, 1879 (type genus *Ischnurus* C.L. Koch, 1837, a junior subjective synonym of *Liocheles* Sundevall, 1833). It is proposed that the entire generic name of *Ischnura* should be adopted as the stem, so that the correct spelling of the damselfly subfamily will be ISCHNURAINAE Fraser, 1957.

**Keywords.** Nomenclature; taxonomy; Odonata; Scorpiones; COENAGRIONIDAE; ISCHNURAINAE; ISCHNURINAE; ISCHNURIDAE; *Ischnura*; *Ischnurus*; *Liocheles*; damselflies; scorpions.

---

1. The scorpion family name ISCHNURIDAE was based by Simon (1879, p. 92) on the type genus *Ischnurus* C. L. Koch, 1837 (p. 69). This name has been widely used at family rank (e.g. Kraepelin, 1913; Tikader & Bastawade, 1983; Francke, 1985); although the taxon has sometimes been regarded as a subfamily of SCORPIONIDAE Latreille, 1802 its treatment as a separate family is now generally accepted (see Sissom, 1990 and Fet, 2000).

2. None of the recent authors who have used the name ISCHNURIDAE in scorpion taxonomy has noticed the fact (Fet, 2000, p. 383) that it is based on a junior generic synonym. This synonymy was noted indirectly by two authors: Karsch (1880, p. 408), who synonymized *Hormurus* Thorell, 1876 with *Liocheles* Sundevall, 1833 (p. 31), and Pocock (1902, p. 364), who synonymized *Hormurus* with *Ischnurus* C.L. Koch, 1837. *Liocheles* (type species by monotypy *Scorpio australasiae* Fabricius, 1775 (p. 399)) is the generic name currently used (e.g. L.E. Koch, 1977; Tikader & Bastawade, 1983; Francke, 1985; Lourenço, 1989; Sissom, 1990), but ISCHNURIDAE (or ISCHNURINAE) is in general use and under the Code (Article 40.1 of the 1999 edition) there is no need to create a new name 'LIOCHELIIDAE'.

3. The damselfly subfamily name ISCHNURINAE Fraser, 1957 (p. 49; Odonata, family COENAGRIONIDAE) is based on the genus *Ischnura* Charpentier, 1840 (p. 20; type

species *Agrion elegans* Van der Linden, 1823 (p. 104) by the subsequent designation of Selys-Longchamps (1850, p. 182)). This well-known genus not only includes common species of damselflies throughout the Nearctic and Palaearctic, but probably represents the most truly cosmopolitan genus of Zygoptera, occurring almost wherever Odonata are found (Westfall & May, 1996). The name ISCHNURINAE Fraser, 1957 has no synonyms and has been widely used (always at subfamily rank) in taxonomic works on Odonata (see for example Davies & Tobin, 1984 and Bridges, 1994).

4. Under Article 55.3.1 of the Code the homonymy between ISCHNURIDAE Simon, 1879 (for scorpions) and ISCHNURINAE Fraser, 1957 (for damselflies) must be referred to the Commission. In accordance with Recommendation 29A we propose that the entire generic name *Ischnura* should be used as the grammatical stem, so that the damselfly subfamily name would be ISCHNURINAE and the homonymy would be removed.

5. The International Commission on Zoological Nomenclature is accordingly asked:

- (1) to use its plenary power to rule that for purposes of Article 55.3.1 of the Code the stem of the generic name *Ischnura* Charpentier, 1840 (Insecta, Odonata) is ISCHNURA-;
- (2) to place on the Official List of Generic Names in Zoology the following names:
  - (a) *Ischnura* Charpentier, 1840 (gender: feminine), type species *Agrion elegans* Van der Linden, 1823 by subsequent designation by Selys-Longchamps (1850);
  - (b) *Liocheles* Sundevall, 1833 (gender: masculine), type species *Scorpio australasiae* Fabricius, 1775 by monotypy;
- (3) to place on the Official List of Specific Names in Zoology the following names:
  - (a) *elegans* Van der Linden, 1823, as published in the binomen *Agrion elegans* (specific name of the type species of *Ischnura* Charpentier, 1840);
  - (b) *australiae* Fabricius, 1775, as published in the binomen *Scorpio australasiae* (specific name of the type species of *Liocheles* Sundevall, 1833);
- (4) to place on the Official List of Family-Group Names in Zoology the following names:
  - (a) ISCHNURINAE Fraser, 1957 (type genus *Ischnura* Charpentier, 1840) (correct original spelling of ISCHNURINAE by the ruling in (1) above);
  - (b) ISCHNURIDAE Simon, 1879 (type genus *Ischnurus* C.L. Koch, 1837, a junior subjective synonym of *Liocheles* Sundevall, 1833).
- (5) to place on the Official Index of Rejected and Invalid Family-Group Names in Zoology the name ISCHNURINAE Fraser, 1957 (spelling emended to ISCHNURINAE by the ruling in (1) above).
